Charcoal fired furnaces are one of the easiest furnaces to build and run on a small scale (under 150 pounds of bronze). Essentially you have a refractory lined cylinder which has a hole place perpendicular and near the bottom. A low powered blower is inserted into the blower port or tuyere (tweyer).

power plants could especially benefit nuclear plants, which are costly to build. Policies that reduce the cost of fossil fuels could benefit natural gas plants, which are inexpensive to build but rely on an expensive fuel. The report provides projections of the possible cost of power for new fossil, nuclear, and renewable plants built in 2015.
