

cat evolution 3rd edition pdf

The cat or domestic cat (*Felis catus*) is a small carnivorous mammal. It is the only domesticated species in the family Felidae. The cat is either a house cat, kept as a pet; or a feral cat, freely ranging and avoiding human contact. A house cat is valued by humans for companionship and for its ability to hunt rodents. About 60 cat breeds are recognized by various cat registries.

The sand cat (*Felis margarita*), also known as the sand dune cat, is the only cat living chiefly in true deserts. This small cat is widely distributed in the deserts of North Africa, the Middle East and Central Asia. Starting in 2002, it was listed as near threatened on the IUCN Red List because the population was considered fragmented and small with a declining trend.
