An electric vehicle network is an infrastructure system of charging stations and battery swap station to recharge electric vehicles. Many government, car manufacturers, and charging infrastructure providers sought to create networks. As of December 2016, Estonia remained the only country to have completed a nationwide public electric charging network.

Overview. USB was designed to standardize the connection of peripherals like keyboards, pointing devices, digital still and video cameras, printers, portable media players, disk drives and network adapters to personal computers, both to communicate and to supply electric power. It has largely replaced interfaces such as serial ports and parallel ports, and has become commonplace on a wide range ...
