The goal of this document is to help operational teams with the configuration of TLS on servers. All Mozilla sites and deployment should follow the recommendations below. The Operations Security (OpSec) team maintains this document as a reference guide to navigate the TLS landscape. It contains ...

Security/Server Side TLS - MozillaWiki

A thin client is a lightweight computer that has been optimized for establishing a remote connection with a server-based computing environment. The server does most of the work, which can include launching software programs, crunching numbers, and storing data. This contrast with a fat client or a conventional personal computer; the former is also intended for working in a client-server ...
