Clinical neurophysiology is a medical specialty that studies the central and peripheral nervous systems through the recording of bioelectrical activity, whether spontaneous or stimulated. It encompasses both research regarding the pathophysiology along with clinical methods used to diagnose diseases involving both central and peripheral nervous systems.

Clinical neurophysiology - Wikipedia

Neuroscience is a discipline primed for the challenges affecting human health within the 21st century. It provides better understanding of brain function through cutting-edge research and clinical practice. Numerous inquiries about how the brain works date back to the dawn of civilization, however, this academic discipline is still in its infancy.

Why do we think we're so bad at maths, when we're all - almost all - born with brain circuits specialised for numbers? Our ability to use numbers has been the key from taking us from the Stone Age to the Phone Age. Trade, science and technology would be impossible without this ability. Neuroscientist Brian Butterworth

argues that we are all born with brain circuits specialised for numbers.
