

corals of technology crow pdf

Coral reefs are one of the most biologically diverse ecosystems in the world – they occupy less than 1% of the ocean floor, but are inhabited by at least 25% of all marine species.

Corals and Reefs for PDF - International Coral Reef Initiative

Coral reefs are the skeletons of stony coral polyps cemented together. Corals grow very slowly - some grow only about 3-20mm per year. Therefore, some reefs form over several million years (Veron, 2000). As these corals grow and die, they leave behind their calcium carbonate skeletons. On these skeletons, other corals grow.
