An eyepatch is a small patch that is worn in front of one eye. It may be a cloth patch attached around the head by an elastic band or by a string, an adhesive bandage, or a plastic device which is clipped to a pair of glasses.

Eyepatch - Wikipedia

Motion perception is the process of inferring the speed and direction of elements in a scene based on visual, vestibular and proprioceptive inputs. Although this process appears straightforward to most observers, it has proven to be a difficult problem from a computational perspective, and extraordinarily difficult to explain in terms of neural processing.

What Is It and What Should We Do About It? Michelle Van Cleave. Ever since Sherman Kent's signature work was published, strategic intelligence has been the subject of literature, study, and practice, and, although an author in the pages of this issue of Studies will disagree, the subject has come to occupy a well-established place as a core intelligence product line and mission.
