SYNOPSIS: Students will experience the historical discovery of fossils that increasingly link whales to earlier land-dwelling mammals. This experience reveals how scientists can make predictions about past events, based on the theory and evidence that whales evolved. Such predictions suggest the age and location of sediments where fossils of early whales would most likely be found, and even ...

An interpretation of social and psychological development that could also be considered a theory of spiritual evolution is spiral dynamics, based on the work of Clare W. Graves.. More recently the concept of spiritual evolution has been given a sort of respectability it has not had since the early 19th century through the work of the integral theorist Ken Wilber, in whose writings both the ...

Evolution is the process of change in all forms of life over generations, and evolutionary biology is the study of how evolution occurs. Biological populations evolve through genetic changes that correspond to changes in the organisms' observable traits. Genetic changes include mutations, which are caused by damage or replication errors in organisms' DNA. ...

The evolution of the peppered moth has been studied in detail over the last 150 years. At first, almost all of the moths were light coloured. This gave them camouflage against the light-coloured trees and lichens where they rested during the day. As pollution increased during the Industrial Revolution in England, many of the lichens died out. The trees became blackened by soot, and most of the ...

The "debate" over evolution between T. H. Huxley and Bishop Samuel Wilberforce at the 1860 meeting of the British Association for the Advancement of Science in Oxford is an iconic story in the history of evolution and, indeed, in the history of the conflict between science and religion, second only to Galileo's troubles with the Vatican.
