Their estimates suggest some variation, with males obtaining a 15% increase and females a 10% increase per standard deviation of test performance. Lazear (2003), relying on a somewhat younger sample from the National Education Longitudinal Study of 1988, provides a single estimate of 12%.

### **The impact of education quality on development goals**

The Evolution of Education. The world changed when Howard Gardner and others came along and turned education on its head by promoting an agile teacher model. In this model the teacher "be they traditional classroom teachers or coaches, speakers or mentors" would adapt how they taught to meet the varying student needs.
