CDCC CDDCC DDDDD. ... One of the building blocks of evolutionary game theory is that fitness (a measure of reproductive success relative to some baseline level) of a phenotype depends both on the quality of the phenotype itself and on the interactions with other phenotypes in the population: fitness is hence frequency dependent [15],...

Evolutionary Dynamics presents those mathematical principles according to which life has evolved and continues to evolve. Since the 1950s biology, and with it the study of evolution, has grown enormously, driven by the quest to understand the world we live in and the stuff we are made of. Evolution is the one theory that transcends all of biology.
