Friction Factors. Note: I have tried to include a wide range of relevant information on this topic. It will be noted that friction values in one section do not necessarily agree with values in another section...Please use the linked references at the bottom of the page for more detailed information.

Tribology is the science of rubbing surfaces and contributes to every facet of our everyday life, from live cell friction to engine lubrication and seismology. As such tribology is truly multidisciplinary and this extraordinary breadth of scientific interest is reflected in the scope of Tribology International.. Tribology International seeks to publish original research papers of the highest ...

1. Introduction. Concrete has been placed in formworks by means of pumping for decades. Although pumping of concrete can be regarded as a special case of pipe flow fluid dynamics, the main approach to study the behavior of concrete in pipes was practical and empirical of nature.

The Journal of Materials Processing Technology covers the processing techniques used in manufacturing components from metals and other materials. The journal aims to publish full research papers of original, significant and rigorous work and so to contribute to increased production efficiency and improved component

performance.

Smoothed-particle hydrodynamics (SPH) is a computational method used for simulating the mechanics of continuum media, such as solid mechanics and fluid flows. It was developed by Gingold and Monaghan and Lucy in 1977, initially for astrophysical problems. It has been used in many fields of research, including astrophysics, ballistics, volcanology, and oceanography.

Triboluminescence is an optical phenomenon in which light is generated through the breaking of chemical bonds in a material when it is pulled apart, ripped, scratched, crushed, or rubbed (see tribology). The phenomenon is not fully understood, but appears to be caused by the separation and reunification of electrical charges. The term comes from the Greek $\tau\rho\iota\beta\acute{\omega}\mu\omicron\iota$ ("to rub"; see tribology ...
