TDC1000 Ultrasonic Sensing Analog Front End (AFE) for

The Series SAH SMART Air Hood® Balancing Instrument is the most accurate and easy to operate air flow hood on the market. By using the included hood stand and wireless communications to the handheld, a single operator can balance a branch in less time than traditional balancing teams.

Series SAH | SMART Air Hood® is accurate and easy to

Optical flow or optic flow is the pattern of apparent motion of objects, surfaces, and edges in a visual scene caused by the relative motion between an observer and a scene. Optical flow can also be defined as the distribution of apparent velocities of movement of brightness pattern in an image. The concept of optical flow was introduced by the American psychologist James J. Gibson in the ...

Optical flow - Wikipedia

Flow measurement is the quantification of bulk fluid movement. Flow can be measured in a variety of ways. The common types of flowmeters that find industrial ...

Flow measurement - Wikipedia

Description Powerful, Yet Sensitive! The B260 will enhance fish detection on virtually all of today's fish finders. High-performance has been redefined with its Broadband Ceramic Technology.

Our integrated circuits and reference designs help you create an innovative infusion pump system design with accurate sensing technologies to better manage fluid dosage and transmit data to the cloud. Infusion pump designs often require: Highly accurate sensing to measure flow, temperature, air and

Helpful Product from Spartan Scientific Series CRDV/s Wi-Fi. The Spartan Scientific Series CRDV/s Condensate Removal Drain Valve with optional Wi-Fi keeps your air compressor tank and air lines free of moisture automatically by coupling a state of the art, closed loop sensing system with a robust high flow diaphragm solenoid valve.
