Nutrition is the science that interprets the interaction of nutrients and other substances in food in relation to maintenance, growth, reproduction, health and disease of an organism. It includes food intake, absorption, assimilation, biosynthesis, catabolism, and excretion. The diet of an organism is what it eats, which is largely determined by the availability and palatability of foods.

Abstract. The notion of paying college football players has been an ongoing debate since the early 1900s. With current television revenue resulting from NCAA football bowl games and March Madness in basketball, there is now a clamoring for compensating both football and basketball players beyond that of an athletic scholarship.

Hidden in Plain Sight Added sugar is hiding in 74% of packaged foods. We tend to think that added sugar is mainly found in desserts like cookies and cakes, but it's also found in many savory foods, such as bread and pasta sauce. And some foods promoted as "natural" or "healthy" are laden with added sugars, compounding the confusion. In fact, manufacturers add sugar to 74% of packaged foods sold ...

Soy comes from soybeans. Soybeans or soya beans are legumes which grow throughout much of the world and constitute one of the world's major food crops. The beans can be processed into soy protein, which is a powder; soymilk, which is a beverage that may or may not be fortified with extra calcium from the soybeans; or soy fiber, which contains some of the fibrous parts of the bean.
