Program Statement; Program Focus; Program Concentration Modules; Although EMU does not directly grant degrees, it offers academic programs up to the phase of a Master and PhD proposal and research.

Energy Medicine University :: Program Overview

Biological thermodynamics is the quantitative study of the energy transductions that occur in or between living organisms, structures, and cells and of the nature and function of the chemical processes underlying these transductions. Biological thermodynamics may address the question of whether the benefit associated with any particular phenotypic trait is worth the energy investment it requires.

Biological thermodynamics - Wikipedia

The aim of this note is to create an in-depth awareness and develop full understanding of the concept of energy as the capacity for change in any chemical reaction and moreover that strong relationship between energy and structure of matter is the foundation of physical chemistry.

Vitalism is the belief that "living organisms are fundamentally different from non-living entities because they contain some non-physical element or are governed by different principles than are inanimate things". a Where vitalism explicitly invokes a vital principle, that element is often referred to as the "vital spark", "energy" or "Ã©lan vital", which some equate with the soul.

The Sacred Centers Certification Program (SCCP) offers a guided pathway of thorough chakra study and personal growth. It trains individuals in a thorough understanding and application of the chakra model for personal and professional development. SCCP empowers spiritual catalysts to carry this work into the world.

Major in Chemistry for Education. Chemistry for Education: This is a second major for students in the College of Education who wish to teach chemistry at the high school level. The major consists of 30 credit hours: six (6) required chemistry courses (23) credit hours and seven (7) credit hours of chemistry electives.

Have you ever wondered what being alive is like? What actually happens inside when we go about our business of living? What happens in our tissues, cells and molecules? When we dance, do our tissues, cells and molecules dance too? Do they dance when we sit still? The title of my talk is "Quantum ...

The cell danger response (CDR) is the evolutionarily conserved metabolic response that protects cells and hosts from harm. It is triggered by encounters with chemical, physical, or biological threats that exceed the cellular capacity for homeostasis.

Las arqueas (Archaea; et: del griego ἄρκη [arkhā-a], «las antiguas»), a veces llamadas "arqueas", son un grupo de microorganismos unicelulares que, al igual que las bacterias, tienen morfología procariota (sin núcleo ni, en general, orgánulos membranosos internos), pero son fundamentalmente diferentes a éstas, de tal manera que conforman su propio dominio y reino.
