KS3 Maths sticky labels: ordering negative numbers fractions decimals percentages and mixed numbers From a 5 to a 6. This great resource will help you, your students, school managers, and classroom visitors determine where each student is in this bit of maths and what needs to be done to get to the next level.

Ordering negative numbers, fractions, decimals by

An algebraic fraction is the indicated quotient of two algebraic expressions. As with fractions of integers, the denominator of an algebraic fraction cannot be zero. Two examples of algebraic fractions are $\frac{a}{b}$ and $\frac{c}{d}$. Algebraic fractions are subject to the same field properties as arithmetic fractions. If the numerator and the denominator are polynomials, as in $\frac{a}{b}$, the algebraic ...

Fraction (mathematics) - Wikipedia

You are here: Home » Articles » Teaching Fractions Why are fractions so difficult to learn? As many teachers and parents know, learning the various fraction operations can be difficult for many children. It's not the concept of a fraction that is difficult - it is the various operations: addition, subtraction, multiplication, division, comparing, simplifying, etc. of fractions
