Computer-aided design (CAD) is the use of computer systems (or workstations) to aid in the creation, modification, analysis, or optimization of a design. CAD software is used to increase the productivity of the designer, improve the quality of design, improve communications through documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files ...

Brainstorming is a group creativity technique by which efforts are made to find a conclusion for a specific problem by gathering a list of ideas spontaneously contributed by its members.. In other words, brainstorming is a situation where a group of people meet to generate new ideas and solutions around a specific domain of interest by removing inhibitions.

where a  $j$  refers to the input variables,  $W_{ij}$  is the weight of input node  $j$  on node  $i$  and function  $g$  is the activation function, which is normally a nonlinear function (e.g., sigmoid or Gaussian function) to transform the linear combination of input signal from input nodes to an output value. The training of an ANN is done by iterative modification of the weight values in the network to ...
