Traditional approaches to the ethics of robotics are often distant from innovation practices and contexts of use. We list key concerns of ethics of healthcare robots.

### **Ethics of healthcare robotics: Towards responsible**

Robot ethics, sometimes known by the short expression "roboethics", concerns ethical problems that occur with robots, such as whether robots pose a threat to humans in the long or short run, whether some uses of robots are problematic (such as in healthcare or as 'killer robots' in war), and how robots should be designed such as they act 'ethically' (this last concern is also called machine ...

### **Robot ethics - Wikipedia**

A robot is a machine—especially one programmable by a computer—capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed to take on human form but most robots are machines designed to perform a task with no regard to how they look.
