The Bartle taxonomy of player types is a classification of video game players based on a 1996 paper by Richard Bartle according to their preferred actions within the game. The classification originally described players of multiplayer online games (including MUDs and MMORPGs), though now it also refers to players of single-player video games.. The taxonomy is based on a character theory.

These operators will operate on a wave function, Ψ , which is assumed to exist, and which is assumed to contain all that is knowable about the quantum mechanical system.We would then solve the resulting equation to get the particulars. And so, in this example, we can write the substitutions into the classical expression for total energy.
